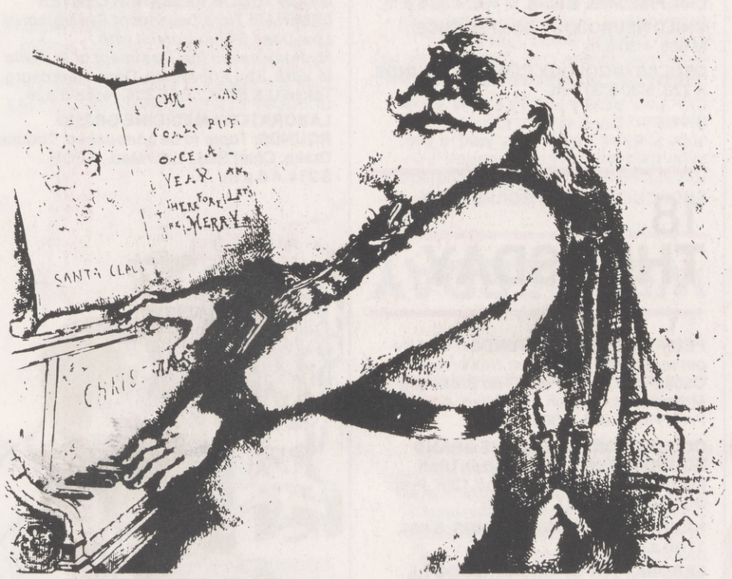
RUSH — TIME DATED

TODAY & TOMORROW



See inside Newsbriefs for campus holiday activities.

"A Day for Our Dean," a scientific symposium in appreciation of Julius R. Krevans' first ten years at the UC-San Francisco School of Medicine, will be held on Friday, January 9 from 2 to 4:30 p.m. in Cole Hall.

Chancellor Francis A. Sooy and Rudi Schmid, professor of Medicine and symposium chairman, will present the welcoming remarks. Following will be lectures by other UCSF distinguished faculty including: *Recombinant DNA,* William J. Rutter, professor and chairman, Biochemistry; *Oncogenic Viruses,* J. Michael Bishop, professor, Microbiology; *Biology of the Synapse,* Zach W. Hall, professor, Physiology; *Lipids and Atherosclerosis,* Richard J. Havel, professor, Medicine and director, CVRI; *Cardiorespiratory Research in the Neonatal Period,* John A. Clements, professor, Pediatrics; and *Trauma Care,* Donald D. Trunkey, professor, Surgery and chief, Surgery, SFGH. Faculty, students, staff and friends are invited to attend.

The John A. Hartford Foundation has awarded a $627,235 research grant to the Health Policy Program to test the effectiveness of teaching hospital cost containment programs.

The project will compare three different educational programs designed to improve the appropriateness and cost effectiveness of physician ordering of hospital services. While similar programs have been used in other hospitals in the country, this is the first attempt to compare and evaluate them systematically.

Principal investigator for the three-year project is Steven A. Schroeder, professor of Medicine and chief of the Division of General Internal Medicine. Lois P. Myers will serve as project director and Stephen J. McPhee as medical director for the study.

The study is based on findings from other teaching hospitals that physicians in training often order more laboratory tests and other services for their patients than necessary and may have little idea of how much such tests cost, according to Schroeder. As a result of these and other factors, the cost of medical care, and especially hospital care, has been rising steadily and rapidly.

According to Schroeder, the research project is designed to assist other medical schools and hospitals in determining how best to teach their own medical staffs to use hospital resources more prudently and frugally. It also will improve medical school curricula by integrating concepts of cost, efficiency and patient care to give future physicians a more well-rounded education in the practice of medicine.

Ground was laid for this project through the initiative of William Kerr, director of Hospitals and Clinics, and Julius Krevans, dean of the School of Medicine, who led a year-long planning effort to determine the feasibility of such a cost containment effort. The planning year was supported by the California Hospital Association, the California Medical Education and Research Foundation (CMA) and UC-San Francisco Hospitals and Clinics.

NEWS BRIEFS

Several activities will be occurring on campus in celebration of the holiday season. Through Friday, December 19, the Athletic Control Desk in Millberry Union is having a pre-Christmas sale of all inventory. All items over $5 are being sold for 10% off. In addition, gift certificates for a one-hour massage are available.

Langley Porter will have their annual "Grab Bag" on Wednesday, December 17 from 10 a.m. to 3:30 p.m. in the LPPI lobby. It is sponsored by the Staff Committee for Special Events and benefits all the LPPI wards. Raffle tickets are $1 each, grab bag items, 50¢ each. For further information call x7-395.

On Friday, December 19, the Child Care/Study Center is placing a collection box for toys in the Medical Sciences lobby. In addition, children from the center will stroll the campus caroling.

Volunteer Services is sponsoring a number of holiday events including a "Holiday Show" on Sunday, December 21 at 3 p.m. The campus community, patients and friends are invited to attend the festivities which will feature several entertainers.

Various neighborhood and church groups and several organizations already have begun caroling in the halls of UCSF and will continue through Christmas Day. On Tuesday, December 16, tree-trimming will take place in the lobbies of Moffitt, UC Hospital, Ambulatory Care Center, and LPPI. Beginning Monday, December 15, a cart loaded with items from the gift shop will be taken to all of the patient floors. This "Shopper's Shuttle" will enable patients to easily purchase gifts for their families and friends. All of the nursing units will be participating in a greeting card contest as well as a tree-trimming contest. The Dental Student Wives' Auxiliary will be making Christmas stockings to be given to the parents of all babies born at UCSF on Christmas Day.

A special holiday lunch and dinner for staff, patients and the community will be offered at Moffitt Cafeteria on Christmas and New Year's Day. The Christmas menu consists of turkey and all of the trimmings and on New Year's the traditional ham will be served. The cost is $3.50.

The 1980-81 Faculty Career Development Award winners are: Vicki Alexander, assistant clinical professor, Obstetrics and Gynecology; M. Almira Correia, assistant professor, Pharmacology/Medicine; Betty-ann Hoener, assistant professor, Pharmacy/Pharmaceutical Chemistry, School of Pharmacy; Roberta Kamin, assistant research immunologist, Neurology; Penelope J. Leggott, assistant professor, Growth and Development, School of Dentistry; Ricardo F. Muñoz, assistant professor, Psychiatry; Connie Phillip, assistant professor, Psychiatry; Mary Ann Shafer, assistant professor, Pediatrics; Nancy Wachter-Shikora, acting assistant professor, Biological Dysfunction, School of Nursing; and Suzanne L. Wilson, assistant professor, Neurology.

The primary purpose of the affirmative action faculty development program is to strengthen the development of academic excellence and to increase the diversification of the tenured faculty by assisting minority and female junior faculty members in achieving high quality of scholarship and research necessary for advancement to tenure.

A bust of J. David Gladstone will be dedicated on Thursday, January 8 at 10:30 a.m. in the reception area of the J. David Gladstone Foundation Laboratories for Cardiovascular Disease at SFGH. Over 100 executives of the International Council of Shopping Centers, several distinguished UC-San Francisco faculty members and San Francisco City and County officials are expected to attend the dedication.

Gladstone, a pioneer of the idea of regional enclosed shopping mall centers, including centers in Bakersfield and Northridge, had a long standing interest in medical research. Gladstone, who died in 1971, created a trust in which the entire assets of his estate were to be devoted to research in heart disease. As a result, the J. David Gladstone Foundation Laboratories for Cardiovascular Disease, under the direction of Robert W. Mahley, were established in association with UC-San Francisco and the City of San Francisco at SFGH.

Several UC-San Francisco physicians have been named to help develop the sixth edition of the American College of Physicians' *Medical Knowledge Self-Assessment Program* (MKSAP).

Merle A. Sande, chief of Medical Services at SFGH and vice chairman of the Department of Medicine; and from the Department of Neurology J. Richard Baringer, vice chairman and professor at VAMC; Robert B. Layzer, professor; and Roger P. Simon, assistant professor at SFGH, are among 100 physicians on 15 separate committees who will contribute their expertise in developing this self-evaluation program. It is designed to help practicing doctors review current medical thought and update their medical knowledge. Baringer also is chairman of the Neurology Committee.

The MKSAP was developed by the American College of Physicians (ACP) in the 1960's. Over 35,000 physicians voluntarily used the latest edition.

The text is published every three years and features a syllabus describing developments in 12 subspecialties of internal medicine and self-administered tests for each chapter or subject. Physicians can send their completed tests to the ACP for computerized scoring. Practical patient management problems, designed to test doctors' ability to combine present knowledge with the latest developments in medicine as outlined in the MKSAP text, also are included.

The next edition of the MKSAP will be released in three installments beginning in late 1982.

David W. Allen, clinical professor of Psychiatry, was presented with the 17th Annual J. Elliott Royer Award during the San Francisco Medical Society's annual meeting in early December. At the same time, Allen took over the presidency of the SFMS — the first psychiatrist in the society's 112 years.

Letters nominating Allen for the Royer Award arrived from numerous colleagues and former students repeatedly citing him as an outstanding role model for young physicians. His publications on voyeurism and exhibitionism, on the treatment of patients with hysterical personality, and on the hidden stresses in success were also among the reasons he was selected for the award.

Allen, who maintains a private practice in San Francisco, has been on the UCSF clinical faculty since 1956. He is former president of the Association of the Clinical Faculty and has been a member of the Medical Society since 1954.

The $15,000 Royer Award honors the Oakland physician who died in 1961 and is given to the San Francisco or East Bay physician who has made "the most significant contribution to the advancement of psychiatry and neurology during the past year."

The United Way Campaign raffle winners are: Aurora Gibson, administrative assistant, Pharmacy Technology Laboratory (TV); Camille Hurtado, administrative assistant, Medicine (stereo); Jim Bennett, staff research associate, Medicine at VAMC (Polaroid camera); Howard L. Fields, associate professor, Neurology and Physiology (portable radio); and Molly McLeod, senior illustrator, Educational Media Resources (portable tape recorder).

Arthur Lunblad, assistant dean, School of Dentistry and this year's coordinator of the campaign, thanks the campus community for its enthusiastic support. It is expected that we will reach the goal of $90,000. The campaign is scheduled to end on Friday, December 19.

A course, "Topics in Emergency Medicine", will be given by UCSF's Extended Programs in Medical Education, Monday to Sunday, January 19 to 23, at the Sheraton at Fisherman's Wharf.

This five-day course, for practicing emergency physicians, family practitioners, and others involved in the delivery of emergency care, is designed to increase the competency of physicians handling emergencies in the areas of cardiology, pediatrics, obstetrics and gynecology, infectious disease, ophthalmology, and severe injuries of the hand and face.

For registration information call x2394.

UC-San Francisco faculty and students are invited to submit proposals for Instructional Computing project support for the 1980-81 academic year. These computer support funds can be used for classes or individual student projects, development or use of computer-based instructional programs, purchase of instructional computing equipment as well as generating tests, item banking, test grading, item analysis, text editing and word processing.

The proposals should be brief, include budgetary needs, and specificially identify the planned instructional use, including course number and number of students involved. Submit eight copies no later than Friday, January 9 to Nancy Vega, Academic Affairs Office, Room S 115. The amount of funding for IUC proposals last year averaged $2,200.

Individual faculty and students may be eligible to use the Computer Center's facilities without the need to submit a proposal for IUC funds. To find out your eligibility contact Martin Kamp, director of the Computer Center, x4546. For further information on the IUC funds, contact Sheldon Baumrind, chairman of the Committee on Instruction Use of Computing, x3018.

Applications for 1981-82 cancer researach grants are due in the office of The President's Systemwide Cancer Research Coordinating Committee by January 9, 1981.

These funds provide small grants for new faculty or established investigators in areas of research other than cancer to initiate cancer research projects, and for established cancer investigators to pursue new leads which cannot properly be supported from existing resources.

Those eligible to apply for these funds are members of the Academic Senate including emeriti, appointees at 50% or more of full-time in the clinical professor, adjunct professor or professional research series, and equivalent titles in the agricultural experiment stations.

Information and application forms can be obtained from UCSF's Office of Extramural Support, x2977 or from Clara Else, CRCC administrative assistant in Berkeley, 8-582-2923.
